Re: Consent Decree 09-cv-283-PB
Quarterly Report No. 10
Portsmouth, New Hampshire

Dear Mr Pollins:

In accordance with Consent Decree 09-cv-283-PB, Section V, item paragraph 20, dated August 12, 2009, the City of Portsmouth is submitting this quarterly status report.

The Consent Decree requires the filing of quarterly reports as follows:

Within 30 days after the end of each calendar quarter (i.e., by April 30, July 30, October 30, and January 30) after the Effective Date of this Consent Decree, until termination of this Decree pursuant to Section XVI, the City shall submit a written report for the preceding calendar quarter that shall include a description of the following: i) the status of any construction or compliance measures; ii) the status of all Consent Decree milestones; iii) any problems encountered or anticipated, together with the proposed or implemented solutions; iv) the status of permit applications; v) operation and maintenance operations; and vi) reports to State agencies.

The following is the list of compliance requirements listed in Section IV of the Consent Decree. For clarity the requirements are listed in plain text and the status of the item is shown in **Bold Italic**.

8. **Nine Minimum Controls Compliance Plan.** Attached (*in the referenced CD*) as Appendix A is the Nine Minimum Controls Compliance Plan. The City shall implement the Nine Minimum Controls Compliance Plan in accordance with the schedule specified in Appendix A.

   *i) There are no construction related activities with this item. The compliance measures associated with this item are on-going.*

   *ii) There is no Consent Decree milestone associated with this item.*
iii) There have been no problems encountered or anticipated with this item.
iv) There are no permit applications associated with this item.
v) Operation and maintenance is on-going
iv) There are no reports to State Agencies associated with this item.

9. Wastewater Master Plan. Attached as Appendix B is the WMP SOW dated May 17, 2007. The City shall implement the WMP in Appendix B, and comply with all milestones and schedules in Appendix B.1.

The Schedule listed in Appendix B.1 has been superseded by a schedule submitted as part of the Wastewater Master Plan Final Submission submitted to EPA on November 15, 2010. An implementation schedule was included in section 1.2.5 of that submission. The initial effort included piloting potential technologies with a final report on the piloting effort due to the EPA and DES by September 2012. The City anticipates meeting that compliance deadline.

On Wednesday January 25, 2012 the City received a draft Consent Decree Modification including a proposed schedule for upgrade to the Peirce Island WWTF. This proposed schedule has been reviewed and the Portsmouth City Council voted on April 16th to authorize the City Manager to enter into a signed Consent Decree Modification which modification includes a schedule for completion of secondary treatment upgrades at the Peirce Island Treatment Plant as well as adjustments to the Long Term Control Plan project schedule. Final completion for the wastewater treatment plant upgrades, including compliance with permit requirements, is scheduled for May 2017. Attached is the proposed Consent Decree Modification approved by the Council. The City understands that there may need to be modifications to the form of the Consent Decree Modification, thus final approval and execution is pending. Execution of finalized copy is pending.

i) There are minor pilot related construction activities with this item (see AECOM monthly reports attached). The compliance measures associated with this item are on-going.
ii) The original Consent Decree milestones associated with this item have been met with the exception of the final submission of the Wastewater Master Plan, which based mutual agreement between the City and the EPA was submitted on November 15, 2010. The final revised schedule will be formally incorporated into a revised Consent Decree.
iii) The problems encountered meeting the Consent Decree milestones have been previously identified by the City. Those problems relate to critical regulatory input in the areas of anti-degradation and future permit limits. In addition, we have had a number of start-up related pilot issues (see attached AECOM monthly reports) that have delayed the pilot study. We anticipate the submission of the final pilot report (September 30, 2012) will not be impacted by the delays discussed above.
iv) The Peirce Island WWTF NPDES permit reapplication was submitted in December, 2011.
v) Operation and maintenance activities with this item are being done by AECOM and Blueleaf as part of the pilot study contract.
iv) There are no reports to State Agencies associated with this item that have not also been submitted to the EPA as part of the milestone deadlines. Included for information are pilot study monthly status reports prepared by AECOM which outlines the various issues encountered during operation of the pilot study.
10. Combined Sewer Overflow Facility Upgrades. The City shall implement its April 2005 Final CSO Long Term Control Plan in accordance with the following schedule and shall complete all construction for implementation of the 2005 LTCP by October, 2012:

A schedule revision was requested as part of the November 15, 2010 Final Wastewater Master Plan Submission. Additional time was requested for Lincoln Phase I, II, and III as well as Islington #2 (Cass Street). The schedule adjustment to Islington #2 (Cass St) project was to allow the piloting effort at Peirce Island to move forward sooner. The money allocated for Islington #2 (Cass St) was reallocated to the Peirce Island piloting effort.

In summary, the schedule and project scope adjustments have been necessary to address the difficulties encountered as part of construction in a tight urban environment. Narrow streets, limited staging areas as well as deep sewer in ledge impact the construction schedule. In addition, public concerns related to traffic, dust control, pedestrian traffic, school buses, etc., requires flexibility in construction sequencing.

* As outlined in the proposed Consent Decree Modification approved by the City of Portsmouth on April 16, 2012.
i) The construction related activities with this item are shown on the table above. The compliance measures associated with this item are on-going. Construction on a part of Contract 3 Phase III is in conjunction with work at the adjacent Portsmouth Middle School is underway. The balance of Phase III has been bid and contractor selected. Construction on Phase III is anticipated to start June 4, 2012. Islington #2 has been advertised for bid with a bid opening on May 10, 2010. Construction of Islington #2 is anticipated to start in late June early July 2012.

ii) The Consent Decree milestones associated with this item have met the adjusted schedule.

iii) There are no problems encountered or anticipated with this item.

iv) Wetland and Shore-land permit applications for Lincoln Area Contract 3 Phase III are completed and approved.

v) There are no operation and maintenance activities with this item.

iv) There are no reports to State Agencies associated with this item.

11. **Interim Emissions/Effluent Limits.** Until the City completes construction of and achieves full operation of secondary treatment facilities in accordance with the schedule contained in this Consent Decree, the City shall comply with the interim limits and measures set forth in Appendix C. (See Current AO effluent limits). Thereafter, the City shall comply with the applicable NPDES permit limits then in effect.

With the exception of BOD₅ effluent concentration and pounds the City has met the Interim Emission/Effluent Limits for the Quarter covered by this report. Wastewater Treatment Facility Staff have investigated the BOD₅ issue and have concluded that the soluble fraction of the influent wastewater has increased. Despite 70 - 80% TSS removal of the higher soluble BOD₅ fraction, the character of the influent is making it harder for the chemically enhanced primary treatment to achieve the necessary permit limits. Wastewater Staff is conducting additional tests to further define and remedy this issue.

i) There are no construction related activities with this item. The compliance measures associated with this item are on-going.

ii) There are no Consent Decree milestones associated with this item.

iii) There are no problems encountered or anticipated with this item.

iv) There is no permit application pending associated with this item.

v) There have been no exceptional operation and maintenance activities outside of routine wastewater treatment facility operation associated with this item.

iv) There are no reports to State Agencies associated with this item that have not also been submitted to the EPA as part of the milestone deadlines.

12. **Post Construction Monitoring Plan:**

This item was submitted as part of the June 4, 2010 Wastewater Master Plan Draft submission. The implementation schedule will be adjusted to reflect the new schedule listed in item 10 above.
i) There are no construction related activities or compliance measure associated with this item.

ii) The Consent Decree milestones associated with this item will be met subject to the concerns raised above under paragraph 9, item iii.

iii) There have been no problems encountered or anticipated with this item.

iv) There is no permit application pending associated with this item.

v) There are no operation and maintenance activities associated with this item.

iv) There are no reports to State Agencies associated with this item.

As required by the Consent Decree:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Please call me at 603-766-1416 if you have any questions or require additional information.

Very truly yours,

Peter H. Rice, P.E.
City Engineer, Water and Sewer Divisions
